Thomas Antensaye

QA Engineer / Test Engineer / SDET / Analyst

I love tackling challenging problems, especially those that might seem out of reach. I also love to optimize and innovate. Most of all I love to eat!

EXPERIENCE

QA Engineer

Vermont Systems Inc. May 2017 - May 2020

- Worked in a fully agile scrum environment implementing continuous integration using a modern DevOps toolchain
- Created detailed, comprehensive, and well-structured test plans/test cases
- Performed an integral role in large-scale third-party integration projects
- Acting lead and SME for designing, coding, & testing for accessibility
- Designed and maintained test data to support quality white & black box testing
- Considerable debugging and troubleshooting experience on multiple products
- Tested and qualified hardware devices for integration with company software
- Helped design, develop, and execute automation test strategy
- Experience with API testing

IT Business Analyst

Manneken-Brussel Imports May 2016 - Nov 2016

- Managed software and sales projects while developing strong relationships with stakeholders
- Worked with external software providers to customize high level sales execution, reporting & analytics, and financial software solutions
- Developed the company's first Information Technology Policy
- Provided general ledger accounting support
- Produced weekly sales reports and conducted analysis for sales team members nationwide

Network Engineer Intern

Vermont Energy Investment Corporation May 2015 - Sep 2015

- Assisted in the management, configuration, and deployment of network assets
- Prioritized and troubleshot complex network and systems issues
- Set up company guest WLAN and used Active Directory to manage user data
- Leveraged security tools like Splunk, Nessus, and Trend Micro to assess risk
- Configured and managed virtualization technologies across all environments
